Under Tile Heating

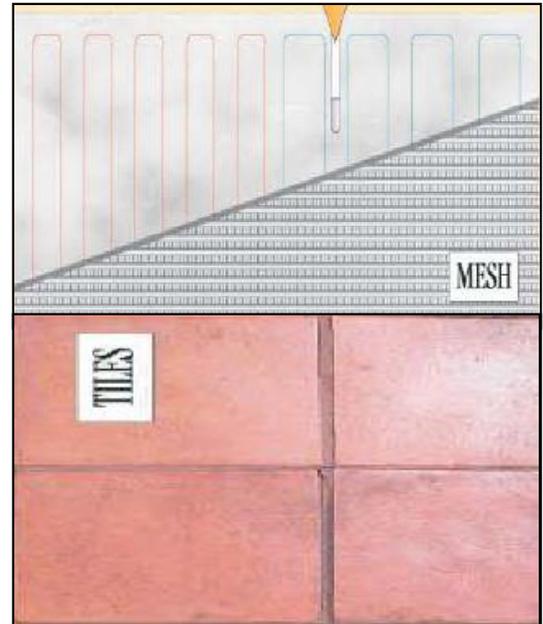

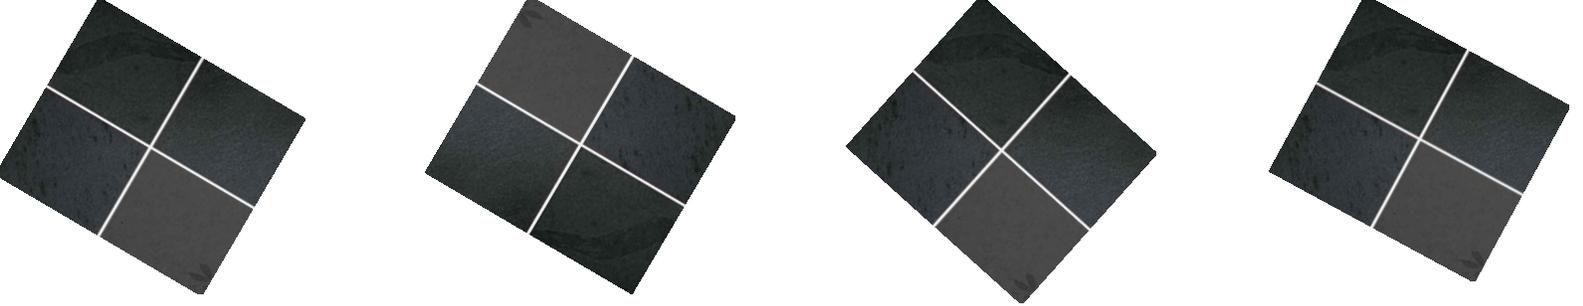

Sherman's Under Tile heating is a healthy option to warm the air and your home. It does not dry heat the air to aggravate allergies or asthma. The heat rises gently through the room, delivering the heat directly to the living area with a minimum heat loss. It can be installed under any tile including wet areas such as the bathroom using an earth shielded cable to eliminate any risk of electrical shock.

Our under Tile heaters are:

- SAFE:** These cables are factory tested, with a strong insulation surrounding them and are completely resistant to a chemical attack.
- UNOBSTRUSIVE:** These cables are discreetly hidden between the screed flooring and tiles, there are no visible elements.
- ECONOMICAL:** Sherman's under tile heaters warm up quicker than under screed heating therefore making a saving on electricity usage when switching it on. These heaters are designed not to overheat and can be left on continuously. Certain controllers also allow better control over the heaters and it can be programmed to cool down when you're not at your home, and heat up prior to your arrival.
- GUARANTEE:** Our under tile heaters are  products and come with a Factory backed warranty of  UNDERTILE AND UNDERFLOOR HEATERS NOW WITH A
- CONTROL:** Although your heater can be left on without controlling it, a thermostat can be installed giving you complete control over the heater and room temperature.

CONTROLLERS:

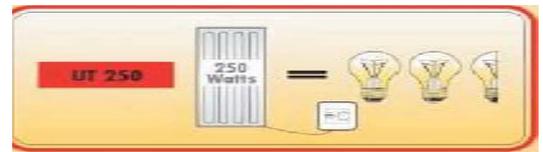

ECONOMICAL

Sherman's Heating can be installed in any room, Wet or dry and is perfectly discreetly hidden and Safe, Eliminating summertime storage problems. It heats within 1 hour so no climbing out of your hot shower or bath onto a cold floor.

Under tile heating is completely repairable so in The unlikely event of guarantee claim, you can Rely on Sherman's Projects to ensure your Satisfaction and have you up and running in no Time at all.
