

SHERMAN'S PROJECTS

Creating Heating Solutions

Specializing in Floor Heating, Heat Pumps & Electrical Accessories

Water Based Floor Heating (WB)

- *Silent operation*
- *Faster response times due to a greater surface area of 16mm PEX pipes*
- *Less expensive running costs, using a heat pump. For every unit of electricity used, heat pump will produce up to 3,5 times the units of heat*
- *Savings of running costs in the region of 80%*
- *Room by room controllers (thermostats) to regulate comfort requirements*
- *Comfortable radiant heat throughout your home or building, and no draughts or hot air trapped up at the ceiling*
- *Better air quality, no dried out air*
- *Pipes are strong and durable and laid in the screed*
- *Low maintenance*
- *Safe – no exposed wires or parts, no electro magnetic radiation*
- *Higher capital cost, with ROI savings of 5 – 6 years*
- *SEG Solar Range- Imported from Austria*
- *10 Year Warranty*
- *25 Years + Life span*
